

Beauty.

Beast.

Inscriber® TitleMotion™: broadcast-quality video titles and motion effects for non-linear editors

To come out on top in the wild world of video production, you need Inscriber TitleMotion, a powerful plug-in for non-linear editors that makes beautiful still and animated video titles in a hurry.

Featuring unsurpassed drawing and text-manipulation tools, TitleMotion creates broadcast-quality graphics with full key channel support, so the titles are automatically laid over the video feed in your editor with full transparency. TitleMotion also operates as a standalone titling package, so you can create titles on a separate computer and import them as TGA graphics with full alpha-channel into your video editing workstation.

And not only does TitleMotion help you create stunning graphics, you can really unleash your creativity with its **powerful motion effects capabilities!** Once you create a still title such as a lower third, you can easily create **multi-layered animations** to fly text, graphics, logos, and draw objects around the screen following customized motion paths.

So contact Inscriber for a demo CD. See for yourself how TitleMotion can turn your video production workstation into a potent graphics brute at a **price that won't devour your budget!**

Use TitleMotion with these leading Win95 and NT-based NLEs

POWERFUL TELEVISION GRAPHICS TOOLS
